PVC-COATED WOVEN INSECT SCREEN / MATERIAL ARCHIVE

TECHNICAL SUMMARY / 01

INSECT SCREENING

Material selection for window, door, and specialist screening.

A practical summary of PVC-coated fibreglass, PVC and polyester mesh, and metal screening - with the information needed to move from a sample to a controlled quotation.

CORE

Fibreglass / polymer / metal

FORMAT

Roll or fabricated

COLOR

Core range + MOQ

REFERENCE SUMMARY Indicative configurations. Confirm against current production data.

INSECT SCREENING

Specify the finished opening, not only the mesh.

INDICATIVE SPECIFICATION	
MATERIAL FAMILY	PVC-coated fibreglass, PVC / polyester mesh, or metal mesh
CONSTRUCTION	Plain woven; mesh count and wire diameter to project
ROLL FORMAT	Width and length confirmed against the selected construction
COLOR	Black and grey core range; white and custom colors subject to MOQ
FINISHING	Roll, cut length, frame insert, or fabricated component by agreement
APPROVAL	Physical sample and written reference before production

BUYER CHECKLIST

01 Target insect or a reference mesh

02 Frame or mounting detail

03 Finished width and height

04 Color direction in daylight

05 Cleaning and handling method

06 Annual quantity and destination

SPECIFICATION NOTE

The mesh and mechanism must be reviewed together. Edge stability, coating, tension, and the intended frame determine whether the finished screen is practical.
